CÉSAR ALEJANDRO DÍAZ CANO

Full Stack Developer & ETL / SQL Server Specialist

cesar.diaz1347@gmail.com | +502 4290-9263 | Guatemala (remote available) | github.com/Cesar-diaz1347 | English: B1

PROFESSIONAL SUMMARY

Electronics, Computer Science and Software Engineer with 8+ years of end-to-end experience in Full Stack development (React, C# / .NET 8-10, SQL Server) and data engineering (SSIS, SSRS, ETL/ELT, Data Warehousing). Track record integrating critical systems in banking, retail, and manufacturing: REST API architectures, business process automation, and large-scale data orchestration into relational databases. Additional freelance experience developing web platforms and inventory control systems. Experienced working in agile environments with Azure DevOps and GitHub Actions. English: B1.

TECHNICAL SKILLS

Backend & Languages: C#, .NET 8 / .NET Core / .NET Framework, ASP.NET MVC, WinForms, T-SQL, Stored Procedures, Triggers, LINQ

Frontend & Web: React.js, Angular, TypeScript, JavaScript, HTML5, CSS3, REST API, JSON, JWT

Data & ETL: SQL Server, SSIS, SSRS, ETL, ELT, Data Warehouse, Datamarts, Database Design, Data Cleaning, PySpark, Python

Cloud & DevOps: Azure DevOps, Git, GitHub Actions, CI/CD, AWS (Machine Learning)

PROFESSIONAL EXPERIENCE

Technology Developer — *Banco Internacional* Jul 2022 – Present

- Led the end-to-end design and implementation of the institutional cafeteria automation system (vendor app, HR order/payment management, electronic payment, and web portal), building the full solution in React, C# (.NET), and SQL Server.
- Designed and implemented ETL pipelines in SSIS integrated with Azure DevOps to consume asynchronous third-party REST APIs, processing JSON data into relational databases.
- Ensured the availability and performance of critical applications (Credit Card Embossing System, Daily Sweepstakes, Customer Service Rating) through ongoing support, optimization, and maintenance.
- Administered and implemented the institution's enterprise reporting ecosystem with SSRS and SSIS, supporting business decision-making.

Support & Database Specialist — *Grupo Unicomer* Jan 2022 – Jun 2022

- Provided support and maintenance for the inter-branch inventory transfer application.
- Debugged, maintained, and optimized the performance of relational databases.
- Designed and executed ETL processes between the Data Warehouse and Datamarts using SSRS, enabling reports that supported business decision-making.

Technology Developer — *Colgate-Palmolive* Nov 2020 – Oct 2021

- Developed an analytics solution for monitoring commercial categories across Central America through tracking dashboards.
- Built a packaging control system integrated with programmable logic controllers (PLCs) for real-time efficiency and operational loss analysis.
- Created an application for productivity analysis by operating category in Guatemala.

Software Developer & DB Administrator — *Autopan (Sur-Occidente) — Freelance* Jan 2018 – Apr 2020

- Fully administered the database and developed the inventory control system through report and process automation.

Systems Developer — *Itics — Freelance* Feb 2016 – Dec 2019

- Developed and provided ongoing support for the academic assignment and student task management platform through iterative backend and database improvements.

EDUCATION & CERTIFICATIONS

Bachelor's Degree in Electronics, Computer Science and Software Engineering

- AWS Machine Learning – Specialty Certification Preparation — *QA* (Sep 2024)
- Data Warehousing Concepts — *DataCamp* (Jul 2024)
- ETL and ELT in Python — *DataCamp* (Sep 2024)
- Big Data Fundamentals with PySpark — *DataCamp* (Sep 2024)

- Database Design — *DataCamp* (Oct 2024)
- Functions for Manipulating Data in SQL Server — *DataCamp* (Nov 2024)
- Cleaning Data in SQL Server Databases — *DataCamp* (Nov 2024)
